

Toeboard Links

When Safety Matters

- Easy to Install
- Versatile
- UV stabilised
- No hot work required
- Re-Usable

One Part, Endless Combinations

Toeboard Links are designed to easily and neatly enclose any penetrations in floor grating. As well as being suitable for FRP floor grating, they suit other types of floor grating including galvanized steel and aluminium.

Our Toeboard Links are quick and easy to install. Their modular design and composite fabrication eliminate the need for hot work. The T5 links come in two configurations depending on the type of flooring to which they are being attached.

The links are manufactured from rigid polyurethane and are non-corrosive and resistant to outdoor exposure and harsh environments.

All links are supplied with safety yellow pigment throughout to provide high visibility.

The unique design of the links means that installation is possible from the top side by one person eliminating any requirement for scaffolding during the installation process.

Fast & Easy Secure & Versatile No Hot Work
